

1836 ORGANIC GIN

RADERMACHER DISTILLERY

1836 ORGANIC GIN

Two centuries of expertise and a rigorous selection of its raw materials go some way towards explaining the distillation secrets of the Radermacher distillery. Uncompromising on quality, it remains faithful to ancestral traditions and recipes while bowing to the demands of modern production, which come together to create distillates of exceptional purity.

Organic farming without the use of artificial pesticides, chemical fertilizers, irradiation, or genetically modified grain is ecology friendly for land and water.

For the Organic 1836 range only certified organic grain is used

1836 ORGANIC GIN

By Radermacher Distillery

How it's made

Produced at Belgium's oldest operational distillery, Radermacher (the gin's name pays homage to the distilleries year of foundation), this gin is the product of nearly two centuries of knowledge and experience.

This gin is made by infusing traditional botanicals with a 100% organic grain distillate. The botanicals used are juniper, bergamot, lemon zest, coriander, angelica, orange peel, cardamom, lavender, elder, and cinnamon.

This produces a classic, citrus and juniper driven gin, with nice flower notes and a little earthy spice. A gin of superb poise.

Radermacher recommend serving this gin with cracked pink peppercorn, a spring of rosemary and pink peppercorn tonic.

DENOMINATION	CONT.	ALC. VOL %
Organic Gin	70 cl	43 %

Monday-Friday 10 am – 6 pm

COLOUR:

Crystal-clear, sparkling reflections.

AROMA:

Its fresh and floral bouquet owes its subtlety and complexity to a secret blend of spices and herbs.

TASTE:

Delicate, sweet and light attack moving towards a hot and spicy finish. There's a predomination of delicacy and fineness in this smooth and gentle concentration.

CONSUMPTION:

1836 Organic Gin is best served on its own so that the full power of its perfumes can be released. It's also an ideal base for cocktails and long drinks.

STORAGE:

We suggest storing the bottles vertically in a cool and dark place.
